

LIFE

A Future Worth Living

No More Excuses
Use Your Vote

The movement for
Proper Change

The party with the
vision, the plan and the policies.

2015

In the 2015 election
you will decide if we ...

Take responsibility for and control of
our society, to be in it together.
Keep our freedom & independence,
as citizens in a 21stC democracy.
Prepare for climate instability, and
invest in securing our power.
Create a society that is fun to live in.

Your choice. My choice.

Proper Democracy

We need more responsive and more effective local government if we are going to make the structural changes we need.

LIFE will bring real power down to our local communities, and the money to deliver decent local services. That means we must have accountable local governments that are responsive to the communities they serve.

LIFE will upgrade local government (Councils) with properly elected Community and Regional Assemblies. England will get regions too.

Every citizen will have a real say in how we provide the basic **WellFair** services to ourselves and our neighbours. At least 52% of spending will be locally controlled.

Local people, elected to local office for 3 years, to design and deliver local services. Paying 5X the average local income will attract candidates with the skills, expertise and experience.

Our choices, and our responsibility to hold them accountable.

Today, we live in a
**corporate controlled,
debt fuelled,
fossil burning,
workhouse.**

The legacy parties have no
vision for a brighter future, let alone
policies that would take us there.

If you want something better,
**you need to make a
different choice in 2015.**

Proper Change

When you're ready for a
**citizen controlled,
contribution based,
sustainable,
joyful society...**

LIFE has the vision and the
policies for a brighter future, a
world for the next generation that
we wish we had grown up in.

A Future Worth Living

Your choice. My choice.

Choose LIFE !!!

The **Most IMPORTANT**
General Election of
your lifetime.

or will we...

Buy our "individual ant" delusion, &
sell our society to corporations.
Lose our freedom as independent
citizens, to a surveillance state.
Make our climate even more unsta-
ble, causing mass migration.
Lose all we have worked for, to leave
a country that is shit to live in.

**There is only one party that is facing
the reality of our situation, and has
real solutions to directly address our
problems: LIFE.**

We have the resources to fix our social
problems, and the technology to fix our
climate problems, but we need an
economy that helps us do it, and we need
proper democracy to make it work.

LIFE's model of "Well Fair, Paid Fair", delivers
the affordable social security system that
frees each of us to create a productive
future that is fun to live in.

LIFE is the only party with the courage to
empower our communities, reform our
local democracy, and make long term
sustainability the goal.

Only **LIFE** will deliver in your lifetime!

One LIFE. One Love. One vote.

Carbon Correction... NOW!

We must act urgently to move off carbon
fuels, and stop the growth of green-house
gases in our atmosphere.

LIFE will implement the simplest remedy,
the one that is supported by all the experts,
and uses the natural forces of the market to
change our lifestyles, industries and
economy: **carbon taxes.**

We will double the Transport budget so
local Communities can provide a good, **free,
local transport** service for everyone — that
will take a million+ car miles off the road,
literally overnight.

National Infrastructure Bonds will help build
new, efficient housing, invest in "smart grids"
for renewable power, and create a high
speed Internet backbone for the UK.

We made this mess, and we can clean it up,
and we need to start in 2015!

LIFE is pro all the life on our planet.

WellFair

The new **Citizen Contract** :

I promise to contribute to our social system, which unconditionally guarantees us all shelter and sustenance, and which strives to provide opportunities for each of us to make the most of our lives.

WellFair Services, Not Cash

Paid Fair

The same taxes for everyone, and that everyone can understand.

- 1 Income taxes used only for **WellFair** — nothing else.
- 2 All income counts the same: no loopholes, no shelters, no tax havens, no allowances, no differences. Paid Fair by all!
- 3 Property taxes stay local to fund local communities.
- 4 VAT & business taxes fund all our other ambitions, including external affairs.
- 5 Carbon and Waste taxes pay the environmental costs of production and disposal.

One LIFE. One Love. One vote.

Keep informed.

Full Employment & Sustainable Economics

We can build an economy in which everyone works. We do not need to pay employers to hire people, nor do we need to pay people to stay at home and not work. Everyone has something to contribute, we just need to let them.

No "benefits trap": No one loses a benefit based in how much they earn.

Always worth contributing. Even the smallest contribution is worth making, because **WellFair** services replace minimum wages, guaranteeing a standard of life.

Vital Infrastructure. Investing in new, publicly-owned infrastructure will fix our housing problem, provide competition for the energy companies and provide the high speed Internet connections every business needs to flourish.

Work is more than a right.

*"I don't want to work, **I need to work!** Providing and contributing through my work is part of what makes me who I am."*

Work is not the involuntary activity of a person with no other choice. It is the act of contributing that creates meaning in our lives, and weaves the wonderful tapestry of our communities. **LIFE** understands the value of work, and **WellFair** frees everyone to work at what they do best, for however much they want, because the basics of life are guaranteed. **WellFair** is a "living wage" equivalent guarantee.
